Bolts at first glance look identical

60MM

55MM

50MM

T87261 – GE EVO 12MM x 1.75 Pitch Gage

This Gage was developed to reduce confusion with regard to installing the wrong length bolt on the power assembly.

- 60MM Long Exhaust
- 55MM Long Power Assembly - Head to Strongback
- 50MM Long High Pressure Fuel Pump Mounting

Caution: Installing the high pressure fuel pump with the 60MM long bolt can result with a loose pump, causing fuel leaks.

Give your team a quick check gage to prevent fuel leaks/fires
