T52060 – FDL Engines

.020 for Intake Valves

.030 for Exhaust Valves

Don't let something so small, end up hurting your engine in a BIG way! Follow the OEM guidelines and set your valves are the proper settings. Not having enough of these on hand, can lead to improper valve lash settings and cause things like valve recession which is one of the leading causes of PA failures on FDL Engines

T85220 – Evo and Tier 4 Engines

.45MM for Intake Valves

.95MM for Exhaust Valves
